Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by van Hekken et al. van Hekken et al shows the use of a bracket (80) adapted to be attached to an armrest support arm (12); a vertical pivot axis (14) attached to the bracket; an armrest support (16) rotatably attached to the vertical pivot axis; and a mechanism (50) for securing the armrest in a fixed position in the horizontal plane.

3. Claims 4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Swenson. Swenson shows the use of a support (16) for a back of a chair connected to a base of the chair; a bracket (18) mounted on the back support; a first link (500) pivotally mounted to the bracket

mounted on the back support; a second link (502) pivotally mounted to the bracket mounted on the back support; a second bracket (504) pivotally mounted to distal ends of the first and second links, with an arm support (30) thereon. A locking mechanism (73) comprises a slider-crank at the interface between one of the links and mounted to the bracket mounted on the back support and second bracket.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swenson et al. The method steps as recited would have been incorporated within the use of the invention as taught by Swenson et al.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nos., 4,307,913, 4,097,088 and 4,244,623 show other armrest assemblies.
